## DUPLICATE AND REPAIR PARTS SHIPPED ALL OVER THE WORLD

NOT only do these Works build locomotives and ship them to all parts of the world, but a most important branch of our service is the supplying of duplicate and repair parts to keep these same locomotives in active service. Many companies, especially those in foreign countries, find that it saves much loss of time in making repairs to keep on hand an adequate supply of those parts which are most likely to require replacement. We will help you to make up a list of duplicate parts for your store room.

# Dependability is the thing that Counts

WITH you railroad men accurate time service is a stern necessity. You cannot afford to take chances on the service rendered by your watch.

That is why a large percentage of railroad men buying watches today are choosing the Hamilton—and that also is why most of the veterans in time inspection service have been carrying Hamiltons for years.

On the great Canadian National Railway they have a train known as the "Ontario Limited." The Conductor of this Northern Speed-King is L. F. McCormick, who

has carried a Hamilton Watch for over seventeen years.

Conductor McCormick speaks of the Hamilton in highest terms, for he, like thousands of other railroad men, knows that his Hamilton is all that a railroad watch should be—and more.

Accuracy and dependability throughout years of service is what you want in a watch. You can be sure of these qualities when you choose a Hamilton. It is really the most economical watch you can buy.

## HAMILTON WATCH COMPANY

*"On the Lincoln Highway"*

LANCASTER, PENNA., U. S. A.

HAMILTON 992  
RAILROAD MODEL

Here is the watch that Hamilton has designed especially for railroad men. The sturdily wrought case is fashioned of 14K Filled Gold and has a unique pendant construction that is practically dust-proof. The bow is equipped with a special, adjustable screw bar which prevents bow pulling out.
