MARATHON QUALITY PETROLEUM PRODUCTS

Experience alone has taught Frisco's technologists—as well as technologists for other railroads—the wisdom of specifying the use of Marathon Fuel Oils. They have learned that with each purchase of Marathon Fuel Oils comes lower costs and improved operation.

Marathon can put the same efficiency and low oil and fuel consumption into the operation of your automobile engine. Drive in where you see the sign of the Marathon Runner. There you will find motor oils, gasolines and greases known and accepted for years by millions of motorists as products of intrinsic value giving increased performance.

Building for Prosperity

REAL builders are forward looking individuals and institutions who, regardless of economic conditions, work consistently toward a sound business development of their particular businesses and the city and state in which that business is located.

The completion of the Tulsa Union Depot project is an important step in that direction.

We sincerely congratulate and express appreciation to the management of the Frisco for this contribution to Tulsa and to Oklahoma—it is a worthy monument.

The Exchange Banks of Tulsa also take pride in their contribution toward the completion of this project:

The late James J. McGraw, president of The Exchange National Bank, was the chairman of the original Union Depot Committee which opened and carried on negotiations with the railroads. His untimely death, March 3, 1928, found his work unfinished. Succeeded by his friend and business associate, Harry H. Rogers, as president of The Exchange Banks, Mr. Rogers also carried on as chairman of the Union Depot Committee until completion was assured.

Prosperity is in the making. The Exchange Banks of Tulsa pledge co-operation in furthering the development of the great Southwest.
