In a Watch there can be No Substitute for Accuracy

KEEPING trains to schedule is a serious business. Especially is this true of Rapid Transit Lines with frequent trains, fast schedules and many stops.

Consequently, Trainmaster B. F. Kelly, of the B & O Staten Island Electrified Lines, chose a Hamilton to aid him in timing his trains. Trainmaster Kelly, like thousands of railroad men throughout the country, knows that in the Hamilton accuracy and dependability come first. They are qualities of which every Hamilton owner is sure.

Ask your jeweler to show you the Hamilton 992 movement in new railroad model cases. Here is the last word in accuracy, sturdiness and rugged beauty. Models can be had in 10K yellow filled gold or 14K green, yellow or white filled gold. These Hamilton models represent the highest development in economical time service.
