If It's a Hamilton that's all you need to know about a Railroad Watch

ENGINEER DUFFIELD, of the Grand Trunk Western, knows a thing or two about railroading—and about watches. When a fireman, back in 1901, Mr. Duffield needed a good watch—a watch that would serve him in his railroad career. He chose a Hamilton.

And if you ask Engineer Duffield as to the wisdom of his choice he'll tell you just this:

"My old reliable Hamilton is keeping time the only way it knows how to do it—accurately. And it's been doing that job for twenty-six years."

Hamiltons purchased in 1901 and Hamiltons purchased today have many things in common. But above all is this true—they are sound investments in time satisfaction—in accuracy and dependability. And that is why Hamiltons are the choice of most railroad men today. They know that thirty-five years of specialization, thirty-five years of scientific research, thirty-five years of building watches especially for railroad men, have resulted in a watch that stands out as a shining example of all that a railroad man must have in a timekeeper.

HAMILTON WATCH COMPANY
LANCASTER, PENNA., U. S. A.

Hamilton Watch
"The Railroad Timekeeper of America"

Ask your jeweler to show you a Hamilton 992 movement in a railroad model case. Here is a combination of accuracy and dependability with a case designed especially for railroad use. The Hamilton 992 may be had in two different types of railroad model cases. In filled yellow gold or filled green or white gold.
