Mr. H. Biggers would like to know if anyone has a good dog for sale. Recently work on various positions at the terminal. Mr. and Mrs. Thomas Scudder are being congratulated on the arrival of a baby girl, Miriam Cecilia, on October 12, 1919.

Miss Ruby Patton, stenographer in the store room, has been unable to work October 15, because of illness. Miss Cozette Parker, was employed in this office as 691 reporter clerk, and has recently been assigned to position of steno-clerk in this office, position vacated by Cozette Parker.

Mr. and Mrs. Everett Hansen, machinist, also have a new baby at their home, a little boy, and they have given him the name of Lloyd Samuel.

Miss Helen Miller, timekeeper, wife and daughter, Mary Jo, spent Sunday September 20. Mrs. Wright, formerly of Springfield, entered the hospital at Madison Heights during the absence of Mr. Callaham. Mrs. Wright, formerly of Springfield, entered the hospital at Madison Heights during the absence of Mr. Callaham.

C. B. Callaham has been acting assistant superintendent in the Tennessee and Charlotte systems. During the absence of Mr. Callaham Mrs. Wright, formerly of Springfield, entered the hospital at Madison Heights during the absence of Mr. Callaham.

It has just developed that the dog was terribly ill, and upon return of terminals moved into it. We presume he attended the ball game. Audy, we all make mistakes.

A. W. Fay of Chaffee, has been assigned to the Springfield Gas and Electric Company as supervising engineer. She has been assigned to the Springfield Gas and Electric Company as supervising engineer.

Miss Ruby Patton, stenographer, store room, was unable to work October 15, because of illness. Miss Cozette Parker, was employed in this office as 691 reporter clerk, and has recently been assigned to position of steno-clerk in this office, position vacated by Cozette Parker.

Cast Steel Spring Bands
That Are Effecting Large Savings

Railroads using our cast steel spring bands report a saving over the cost of manufacturing wrought iron bands in their own shops. Wrought iron bands crease in the corners; the iron is burnt in forging; they are not uniform in thickness, and there is considerable loss due to imperfect welds.

Cast steel bands have solid corners, are free from burning, are of uniform thickness, and require no welding. The strength of these bands compare as follows:

<table>
<thead>
<tr>
<th>Metal</th>
<th>Tensile Strength</th>
<th>Elastic Limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wrought Iron Bands</td>
<td>40,000</td>
<td>25,000</td>
</tr>
<tr>
<td>Cast Steel Bands</td>
<td>70,000</td>
<td>36,000</td>
</tr>
</tbody>
</table>

We can effect a saving in manufacturing cost and insure long wearing bands that are free from failures.
